

Fill Up Your Natural Gas Vehicle At Home With

Phill by BRC FuelMaker enables owners to refill their Compressed Natural Gas (CNG) powered vehicles at home from their existing natural gas supply lines!

Refueling is as easy as 1 . 2 . 3!! Simply plug Phill in to your car whenever its not in use, press %Start+, and let Phill fill your tank! Relax & enjoy your free time as Phill automatically shuts off when your tank is full.

Phill is:

Convenient, refueling a typical compact car overnight allows for over 100 miles of travel.

Quiet, producing no more noise than an air conditioner.

Economical, using no more electricity than an average small appliance.

Flexible, easily mounting inside or outside your garage.

Compact, measuring 30x14x13+

Refuel your Compressed Natural Gas vehicle with Phill and benefit from:

- Single occupant access to car pool lanes
- Free parking where available for AFV's
- The security of fueling in your own home
- More free time
- Fuel bill on your monthly natural gas bill
- Stable fuel rates year round from your state regulated utility
- Contributing to a healthier environment
- Reducing your dependence on foreign oil

Installation is easy! All you need are:

- An existing natural gas supply line
- A dedicated 240 Volt electrical outlet
- Your local authorized dealer for installation
