

Fill Up Your Natural Gas Vehicle At Home With
Phill by FuelMaker enables owner to refill their natural gas vehicles at home from their existing natural gas supply line

Refueling is easy as 1 . 2 . 3!! Simply plug Phill in to your NGV whenever its not in use, press %Start+, and let Phill fill your tank! Relax and enjoy your free time as Phill automatically shuts off when your CNG vehicle is full.

Benefits:

- Convenient:** Phill refuels a typical compact car overnight, allowing for over 100 miles of travel.
- Quiet:** Phill produces no more noise than an air conditioning unit.
- Economical:** Phill uses no more electricity than an average small appliance.
- Flexible:** Phill is easily mountable inside or outside a garage.
